Senior Technical Product Manager with 18+ years driving enterprise-scale platform transformations at Amazon, Fortune 500 financial institutions, and global retail organizations. Published researcher (7 papers, 7 original frameworks) and U.S. patent holder. Track record of delivering \$91M+ in measurable impact across permission systems, license management, survey platforms, payment modernization, and data architecture — managing cross-functional teams across the US, India, and Australia.

PROFESSIONAL EXPERIENCE

Amazon

Apr 2022 – Present

Senior Product Manager, Technical

Seattle, WA

PERU — Unified Permission System & Bedrock/Person Domain (2025 – Present)

- Leading PERU — enterprise-wide authorization platform consolidating fragmented permission systems across Jobs, Interviews, Profiles, Assessments, Offers, and Documents into a single policy-driven engine handling **100M+ daily authorization requests**
- Driving migration from legacy permission frameworks to Cedar policy language with enterprise-wide compliance, observability, and anomaly detection
- Architecting DynamoDB-based permission store with **sub-millisecond latency** for real-time authorization decisions
- Managing **20+ cross-team dependencies** including PDP, Hiring Hub, Interviewer Roster, and Recruiting Hub integrations
- Leading PEMS — fraud detection platform enabling recruiters to block bad actors and prevent security-flagged candidates from advancing
- Driving Project Cremini — Whole Foods Market TA integration impacting **100,000+ WFM associates** across US, Canada, and UK
- Managing Consolidated Profile Experience — eliminating duplicate candidate profiles across Amazon Hire
- Owning GDPR-compliant candidate permission controls, rehire eligibility detection, DSR data deletion automation, and feedback access exception workflows
- Coordinating **7+ concurrent intake streams** across WSTAP, ITA, and cross-functional TA teams

SLIM — Software License & IT Asset Management (2024 – Present)

- Architected SLIM — enterprise platform delivering **\$77M in annual cost savings** through automated software license tracking, compliance, and optimization
- Led product strategy for StoneGate integration — vendor onboarding and 3P software lifecycle management
- Designed self-service workflows reducing license procurement cycle time by **40%**
- Built real-time dashboards for software spend visibility across all Amazon organizations
- Drove Atlassian tool consolidation strategy and on-call operations framework for Enterprise Service Delivery
- Defined and tracked OKRs for license compliance across multiple business units
- Managed cross-functional stakeholder relationships with Finance, Legal, and Procurement teams

- Led quarterly business reviews presenting cost savings metrics to VP-level leadership
- Established automated alerting and reporting workflows for license expiry and compliance violations

FieldSense — Enterprise Survey & Feedback Platform (2022 – 2024)

- Led product management for FieldSense — Amazon's enterprise survey platform that displaced Qualtrics and scaled to **111+ internal teams**
- Drove BBA (Buy with Prime) delivery optimization generating **2,860 basis points GMS growth**
- Designed GDPR-compliant data handling including survey data deletion, privacy controls, and EU data residency
- Built Seller Central integration enabling FieldSense surveys for Amazon's 3P seller ecosystem
- Authored comprehensive user stories, API documentation, and data classification frameworks
- Conducted end-user interviews across **4+ organizational segments** to validate product-market fit
- Managed distributed engineering teams across US and India for sprint planning, backlog prioritization, and release coordination
- Championed Gen AI initiatives within EE-Swat team for intelligent survey analysis and automated insights
- Defined go-to-market strategy for enterprise rollout, achieving 111+ team adoption within 18 months

Wipro Technologies — Managing Consultant

Feb 2008 – Apr 2022

East Brunswick, NJ

TD Bank — Technical Program/Product Manager (May 2016 – Apr 2022)

- Led delivery of multiple concurrent programs (Core Banking, API Platform, Microservices Transformation) serving wholesale and digital banking channels at TD Bank
- Developed replacement strategy for aging legacy platforms with a consolidated Omni-Channel payment platform
- Created strategy ensuring FSDM and Open API Framework compliance; built path toward externalizing APIs for partner ecosystem
- Led SAFE transformation in Payments portfolio — aligned release train with scaled agile principles achieving cost reduction and accelerated deliveries
- Drove technology decision-making during platform selection (buy vs. build), architecture design, and data migration strategy
- Led product and development teams across multiple API frameworks: IFX, REST, GraphQL, Web Services
- Coached leaders to organize around value streams; launched Agile Release Trains and coordinated PI Planning events
- Managed and mentored Product Management team across US and India geographies
- Worked with staffing vendors to identify, interview, and recruit strong technical talent

Nike — Technical Program/Product Manager (Feb 2015 – May 2016)

- Managed global team of **20+ resources** including engineers, testing leads, data leads, and business analysts
- Drove proof of concept for Microservices adoption — first implementation in the business unit, replacing costly legacy infrastructure
- Led Analytics Delivery team — designed Dashboard providing unified Actuals vs. Forecast view across all Nike NA business lines
- Created delivery strategy for consolidated Dashboard transforming internal reports and external data into Inventory and Financial views
- Managed Enterprise Product Catalog Online Transformation Program from inception to delivery
- Provided strategic direction through gap analysis, ROI analysis, cost-benefit analysis across people, process, and technology
- Coordinated cross-functional dependencies across Nike's global retail, e-commerce, and supply chain organizations
- Established data governance framework for retail analytics ensuring quality and consistency across business units
- Delivered stakeholder presentations to VP-level leadership on analytics roadmap and platform modernization strategy

Suncorp Bank, Australia — Principal Consultant / Product Owner (Jan – Sep 2014)

- Delivered Banking Platform Program — replaced **16 core systems with 5 integrated Oracle modules** across 200-person team
- Led integration strategy sessions with business and technical stakeholders for multiyear platform transformation
- Designed Core Banking Consulting Roadmap from requirements and analysis perspective
- Led custom development initiatives in tandem with Oracle migration toward standalone products
- Designed interest calculation bridge component — **still in production 12+ years later**
- Defined **50+ formal integration contracts** across legacy and target systems
- Coached teams in Agile; coordinated PI Planning events and worked with Release Train Engineers

- Managed cross-continental delivery across Suncorp AU, Wipro India/AU, and Oracle India/AU teams
- Tracked tens of thousands of data attributes during system consolidation ensuring zero data loss

Capital One Auto Finance — Principal Consultant / Agile Coach (Sep 2009 – Dec 2013)

- Delivered multiyear Data Transformation through four phases: Complexity Reduction → Forklift → 3NF Normalization → Analytical Layer
- Transformed data environment from a patchwork of tables to a unified Teradata enterprise data warehouse
- Managed Auto Loan Sales Reporting Initiative — framework for dealer incentive alignment from analytical perspective
- Established first Distributed Agile Teams across US and India — pioneered the **Product-Ahead-of-Tech (PAT)** delivery model
- Customized Teradata design for BI requirements; developed proof of concepts for replacing legacy processes
- Designed and executed strategies engaging stakeholders in behavioral change adoption with Agile Coaches
- Managed team of Business Analysts, Developers, and Data Modelers distributed across US and India
- Led Basel compliance data architecture ensuring regulatory reporting accuracy for auto lending portfolio
- Established data quality frameworks and automated validation processes reducing data discrepancies

Dish Network — Associate Consultant / Product Owner (Mar – Sep 2009)

- Delivered Enterprise Product Catalogue — unified data structure for call center applications and web ordering
- Managed delivery of SOA service candidates serving business purposes in conjunction with IT capabilities
- Defined product requirements and acceptance criteria for enterprise catalog services
- Coordinated with architecture team on service-oriented integration patterns
- Facilitated user acceptance testing with call center stakeholders
- Created data mapping documentation for legacy-to-new catalog migration
- Managed vendor relationships for third-party catalog data integration
- Led sprint ceremonies including planning, demos, and retrospectives
- Delivered training and documentation for call center users on new catalog platform

Target — Associate Consultant / Product Owner (Feb 2008 – Mar 2009)

- Created Prescriber and Prescription Modules of Online Pharmacy Application replacing legacy system
- Delivered Data Conversion program for all required operational and compliance data migration
- Interfaced with business and technical teams on strategic approach for pilot and application rollout
- Defined product backlog and prioritization for pharmacy application modules
- Coordinated with regulatory compliance team ensuring HIPAA and pharmacy regulation adherence
- Led cross-functional requirements gathering with pharmacists, IT, and business stakeholders
- Managed defect triage and resolution process across development and testing teams
- Created user acceptance test plans and facilitated UAT cycles with pharmacy operations team
- Documented system integration specs for pharmacy data feeds and prescription verification services
